The Link at the botton of this page will take you to PCI's Database:
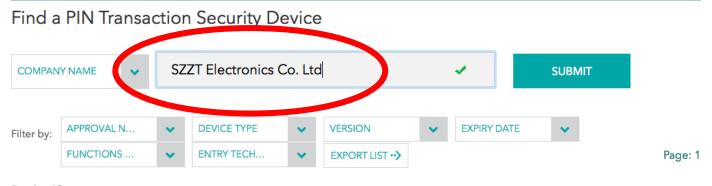

APPROVED PTS DEVICES

PIN Transaction Security (PTS) devices are used by a merchant at the point-of-interaction for capturing payment card data and validating approval of its use for a transaction. The Council, via PCI Recognized Laboratories, validates the conformance of PTS devices to the PCI PTS standard and provides a list of approved devices. The Council urges merchants to use approved PTS devices in their payment environments. Some payment brands require the use of approved PTS devices; entities should contact their acquirer or the payment brands directly for information about such requirements.

Please review the legal conditions and restrictions regarding PCI PTS approval contained in the PTS Device Testing and Approval Program Guide.

Please scroll down and enter „SZZT" to select all of SZZT's EPPs:

Find a PIN Transaction Security Device

| COMPANY NAME | ⌄ | SZZT Electronics Co. Ltd | ✔ | SUBMIT |

Filter by:

| APPROVAL N... ⌄ | DEVICE TYPE ⌄ | VERSION ⌄ | EXPIRY DATE ⌄ |
